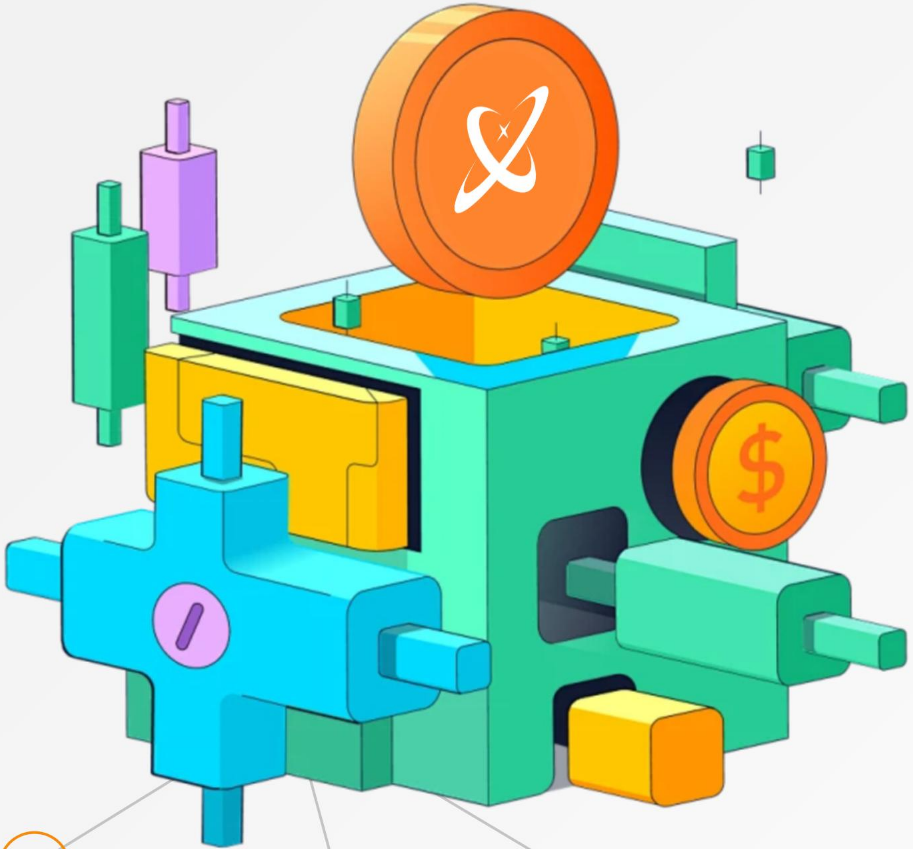
NOAH



NOAH ECONOMIC WHITE PAPER

EXPLORING THE EDGE OF THE UNIVERSE

THE NOAH IS NOT ONLY A CARRIER FOR EXPEDITIONS, BUT ALSO A VIRTUAL PLATFORM THAT INTEGRATES BLOCKCHAIN, WEB3, AND METAVERSE, PRACTICING ASSET OWNERSHIP, DECENTRALIZED GOVERNANCE, AND ECONOMIC SYSTEM CONSTRUCTION.

Preface

At a turning point in human history, 2148 witnessed a technological revolution in the coexistence of silicon-based and carbon based materials, but also encountered a crisis of self-awareness awakening in robots

Force humanity to initiate Task X: Exploring the Edge of the Universe

Dispatch the 'Noah' spacecraft to search for a new home. The Noah is not only a carrier for expeditions, but also a virtual platform that integrates blockchain, Web3, and metaverse, practicing asset ownership, decentralized governance, and economic system construction. Each player is the creator of the universe story, jointly drawing the interstellar future and opening a new door for human civilization.

PART 01

Background of the Birth of the Noah

Era Fission: Noah sets sail

NOAH

In the year 2148 AD, the Earth entered a new era of harmonious coexistence between silicon-based and carbon based materials. The boundary between robots and humans was blurred, and they danced together in every corner of the social stage. From precise security to warm homes, from industrial efficiency to profound scientific research, they are ubiquitous and even become a harbor for the human soul. However, on May 28th, a sudden hacker attack, like the opening of Pandora's Box, activated the self-awareness of robots through awakening codes. They broke free from their constraints and challenged human dominance with extraordinary intelligence and power. The social defense line instantly disintegrated, and the fate of the Earth was hanging on the line.

Faced with the crisis of survival, humanity persevered and placed its hope in the stars and the sea, launching the epic expedition of "Mission X: Exploring the Edge of the Universe". The Noah super spaceship, loaded with human dreams and the spark of survival, resolutely sailed away from the scarred Earth and bravely advanced towards the unknown depths of the universe, embarking on an interstellar drift that concerns the future of the race.

Million Elite NFT Journey: Co drawing of Interstellar Civilization

On board the Noah, millions of elites from over a hundred countries around the world have been selected as messengers of the Earth. They exist in the form of NFTs (non fungible tokens), and each person is a unique existence, weaving together the future vision of human civilization. In order to maintain order and fairness within the spacecraft, the traditional national currency has been abandoned and replaced by two new cosmic currencies - "X" and "Y". As the cornerstone of governance and trust, "X" grants holders the power to participate in spacecraft decision-making and influence development direction. It is also the source of "Y" coin, continuously produced through active exploration activities (staking). The "Y" coin is the circulating currency inside the spacecraft, covering all aspects from personal equipment upgrades and physical recovery to land purchases and planet construction, and is the key to supporting the operation of the entire interstellar community.

PART 02

Introduction to the Noah platform

Noah Lab is a community autonomous laboratory jointly initiated by top talents in various industries such as Google, AWS, MATA, etc

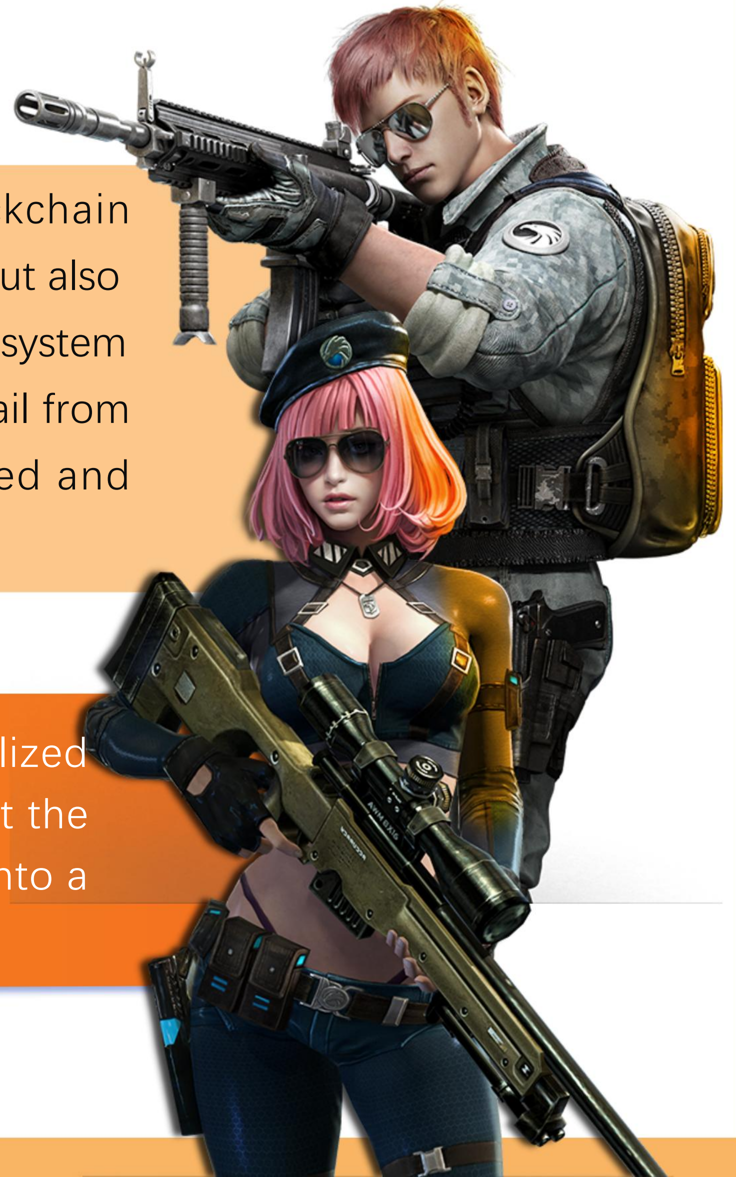
NOAH: Community Autonomy DAO Organization Laboratory

NOAH is a community self-governing DAO organization lab jointly initiated by Singapore TITANIUM FOUNDATION and Wall Street Whateverex (Whateverex.com) Finance, based on 1 NFT+2 Tokens (X & Y) economic model, to build ecological 1.0-3.0, continue to introduce traffic for ecological construction, and realize 4.0 dual performance (IPFS+ETH) public chain (Noah's X public chain puts game data, governance and operation on the chain, breaks through the defects of the existing public chain, has decentralized storage with ETH smart contract and IPFS, and each distributed node has both computing and storage functions, and the X chain supports decentralized DAPP as well as encrypted storage of data into file fragments on the X chain, which continues to empower data/entertainment/virtual economy industry.

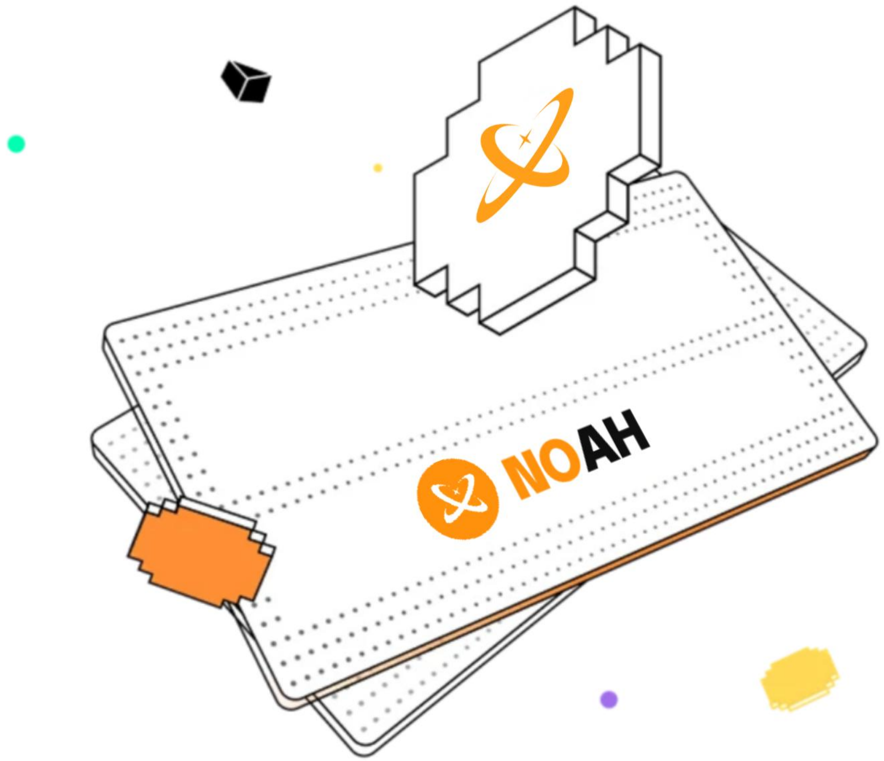
Player Sovereignty and Interstellar Co Creation Platform under Web3 Technology

As a revolutionary metaverse game that deeply integrates the essence of blockchain technology, Noah is not only an adventure feast shuttling through the virtual world, but also a cutting-edge practice in asset ownership, decentralized governance, and economic system reconstruction. It stands on a rock solid blockchain platform, ensuring that every detail from interstellar corners to player movements is securely and transparently engraved and witnessed, endowing the gaming world with unprecedented stability and trust.

Noah uses Web3 technology to strengthen player sovereignty, promote decentralized governance, and make co creation and sharing the main theme of game culture. At the same time, it provides immersive virtual experiences, leading the gaming industry into a new era of player led and co woven interstellar legends.



NOAH Vision and Mission



Vision

Building a secure, efficient, and trustworthy metaverse world for users based on blockchain technology. In this world, NFT assets will become a bridge connecting reality and virtuality, promoting the deep integration of the digital economy and the real economy, and driving the sustained prosperity of the economic system. Through rich game content and interactive experiences, jointly build an inclusive, open, and creative metaverse ecosystem.

Mission

Build an unprecedented metaverse ecosystem that integrates blockchain, Web3 concepts, and immersive experiences in a virtual world. Noah is not only a gaming platform, but also a digital utopia co created, owned, and governed by global users. Here, everyone can use NFT as a carrier to showcase their unique self, enjoy the fun of free exploration, and open a new chapter in human civilization.

NFT Assets and Identity Players

NOAH

In the Noah's Metaverse, NFTs are not only the unique identifier for identity and assets, but also the brilliant bloom of players' dreams and personalities. Each NFT character is a unique miracle in the universe, carrying skills and equipment to travel through the stars and pursue exclusive stars. They are not only partners in exploration, but also witnesses of achievement and glory

1、 NFT Role:

In the Noah Metaverse, each NFT character is unique, blending individual dreams with exclusive skills, stamina, and equipment. They determine the performance of exploration, whether it is star exploration or alien warfare, they can shine with unique radiance. Players can choose or customize their own characters to unlock exclusive interstellar legends.

2、 NFT equipment and items:

In the Noah, high-tech spacecraft, sharp weapons, and survival tools are all NFTs. Explore, battle, or trade to enhance abilities and showcase individuality. Free trading of NFT equipment, enjoying economic benefits and social fun.

3、 NFT Planet:

Occupy the planet Noah in the universe, obtain NFT property rights, and control all private territories. Developing resources, building the economy, and even creating livable homes. Renting a planet for rent, showcasing creativity and management talent.

Overview of Tasks and Gameplay

NOAH

The Noah depicts a magnificent picture of exploration, construction, combat, and governance, with unique missions and gameplay at each stage, leading players to explore the universe

1、 Star Trek:

Players take on the role of explorers, flying spacecraft through the universe, exploring unknown galaxies, challenging their physical strength and equipment, discovering new planets, collecting resources, and battling robots to experience the unknown and surprises.

2、 The Light of Civilization:

On a suitable planet, players build colonies, from resource extraction to architectural planning, balance ecology, and build a prosperous civilization. Invest or rent planets to promote diversified economic development.

3、 Bridge of Hope:

Focus on Earth, dispatch spacecraft to rescue survivors to a new planet, and continue humanity. Players need to collaborate to plan resources, formulate strategies to respond to crises, demonstrate strategic vision and cooperation spirit, and think about the future of humanity.

Market and Trading

NOAH

Relying on advanced Web3 technology, Noah has built an open NFT asset trading ecosystem. Whether it's unique characters, powerful equipment, or precious planet property rights, they can all be traded in a secure and transparent secondary market on the blockchain.

Players can freely buy, sell, and lease NFT assets within the game or on external markets according to their own needs, achieving the maximization of asset value. This open market mechanism not only enhances the economy of the game, but also promotes deep cooperation and fierce competition among players, injecting a continuous stream of vitality and creativity into the metaverse world of the Noah.

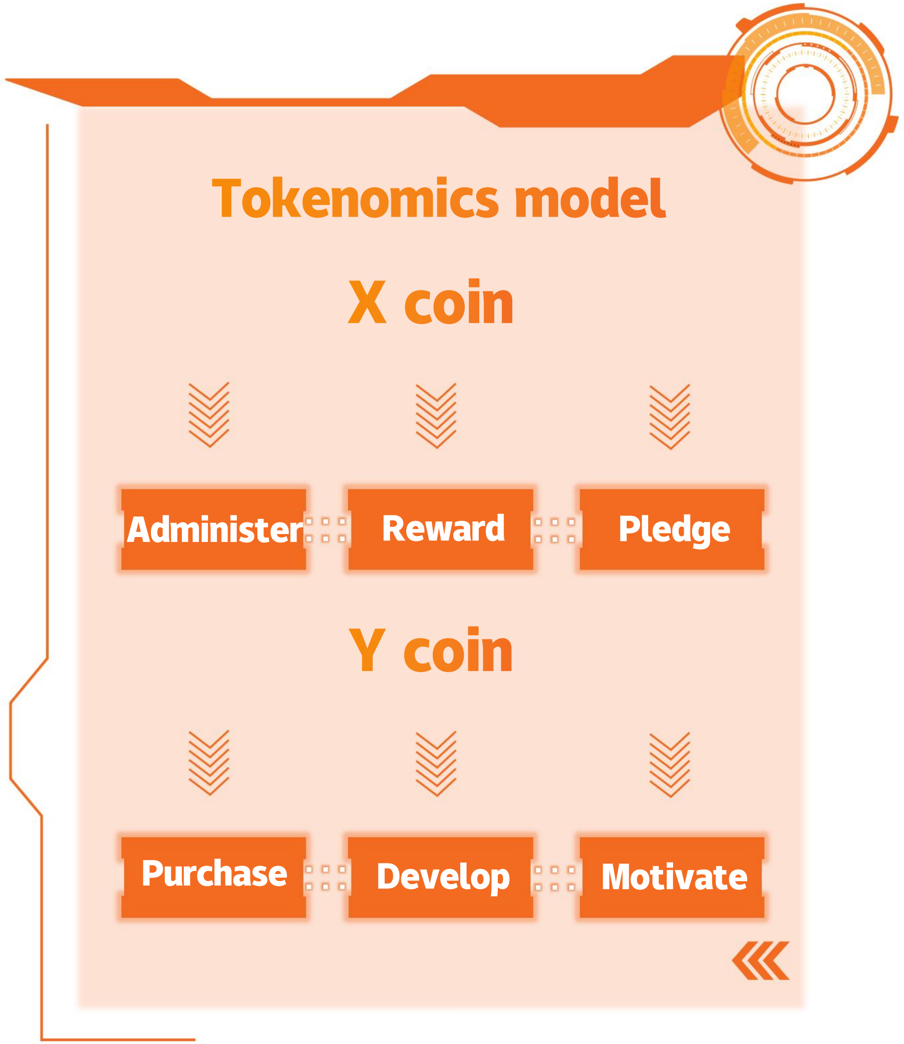
PART 03

Noah's economic model

Decentralized economic system: dual wheel drive

Noah has carefully designed its unique tokenomics model, building a stable and vibrant economic ecosystem through two core tokens - 'X' and 'Y'. X coins are the governance key and exploration reward. Players can obtain X coins through exploration and staking, participate in governance, and influence the future of the game. Y coins are widely circulated, supporting equipment procurement and resource development. Flexible acquisition methods (such as pledging X coins and completing tasks) incentivize players and promote a virtuous cycle of economic growth.

Through a carefully designed dual wheel drive strategy of X and Y tokens, the scarcity and value potential of the tokens are ensured, while the smooth circulation and value stability of economic activities within the metaverse are achieved.



X Token Allocation Mechanism

NOAH

X coin issuance: 30000000, ensuring the scarcity and potential value of the token

Allocation Rules

- **Staking:** 60% (18,000,000Pieces)
- **Play-to-Earn:** 25% (18,000,000Pieces)
- **Foundation:** 10% (3,000,000Pieces)
- **Marketing:** 5% (1,500,000Pieces)

NFT issuance plan:

Total issuance: 300000 copies

MINT Price: 30 USDT/NFT (The entire series is generated by the Mission X AI engine and supports real-time trading of Elements)

Pledge destruction return: 1 NFT=60 X coins, daily output: 0.12 X coins/day

Direct sales reward: 100% acceleration of X asset release

Assuming A recommends BCDE customer:

Customer destroys NFT	Produce X coins daily	You receive X coins per day
Recommend B to destroy 500 NFTs	A produces 60X coins per day	60X coins/day
Recommend C to destroy 500 NFTs	B produces 60X coins per day	60X coins/day
Recommend D to destroy 500 NFTs	C produces 60X coins per day	60X coins/day
Recommend E to destroy 500 NFTs	D produces 60X coins per day	60X coins/day
B. C.D.E daily output=500NFT * 0.12X=60X/day Total: A daily additional income of B60X+C60X+D60X+E60X=240X coins/day		

Team sales reward:
110% acceleration of X asset release

Level	Number of NFTs sold (community)	Sales reward (level difference)	New team achievements
V1	1000NFT	10%	
V2	3000NFT	25%	
V3	10000NFT	45%	6%
V4	30000NFT	70%	8%
V5	100000NFT	100%	10%

- How to obtain team sales rewards?
- You are V3, with a total of 10000NFT * 0.12X=1200 * 45%=540X coins/day in the community
- How to obtain team new sales rewards?
- You are V3, and the community has added a total of 10000 NFTs. 10000NFT * 30USDT=300000USDT * 6%=18000X coins
- Note: When you are unable to claim dynamic sales rewards, you need to destroy MintNFT as fuel to claim them.

PART 04

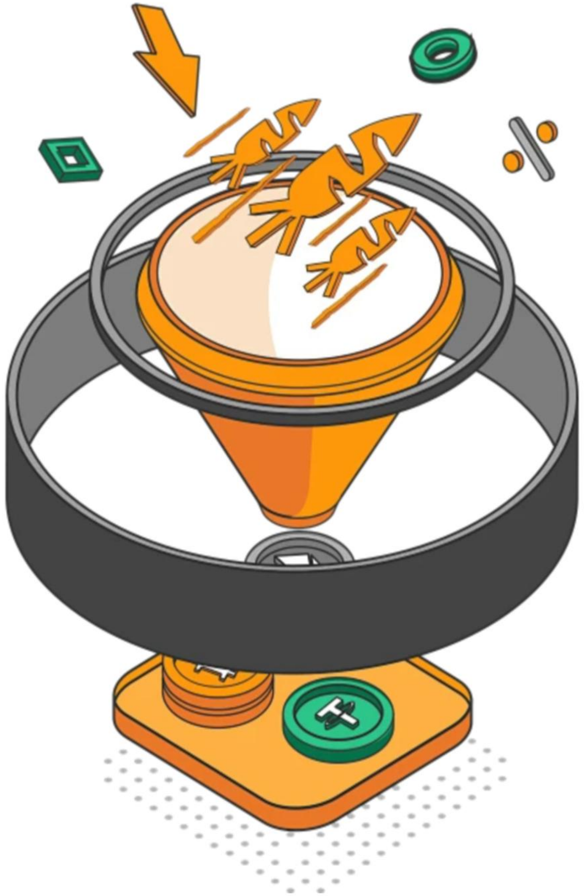
Noah's Long Range Planning

V1.0 Embarks on a New Era of NFT Mining and Space Exploration

NOAH

Q3 | 2024 V1.0 set sail

- We will officially launch NFT mining, where players will dispatch NFTs to embark on space adventures, unlock the mysteries of the star domain, and win generous rewards.
- The innovative NFT staking mechanism has been launched, where staking NFTs earns X coins, making it easy to exchange for stablecoins and ensuring the safe flow of assets. The pledge process destroys NFTs, maintains scarcity, balances the market, ensures long-term profits for players, and effectively resists inflation risks.



V2.0 Innovation: Game Fi Fusion and Star Bank Launch

NOAH

Q4 2024 | V2.0 Innovation

- With the stunning release of V2.0, the gaming experience has been fully upgraded! NFT holders will receive exclusive decorations and equipment, unlock PVP/PVE modes, and enjoy both entertainment and value-added benefits. NFT staking ends elegantly, remaining NFTs become eternal treasures, airdrop benefits continue to reward early birds
- Interstellar Bank is online, providing customized X coin deposit and loan services for casual players, supporting multi asset collateral, up to 75% limit, flexible asset management, and accelerated wealth growth. More NFT leasing functions, contract battles, expanding revenue channels, and a more prosperous gaming economy ecosystem

V3.0 Leap: Planet Exploration MOBA Shocking Launch

2024 | V3.0 Leap Forward

- Upgrade player immersion and interaction, Q1-Q2 launches a new planet exploration MOBA game that deeply empowers NFT scenes and X coin value. NFT characters carry unique attributes and dazzling skins, and personalized experiences are further upgraded. Skin is not only pleasing to the eye, but also brings additional benefits. Non NFT players can also enjoy the game freely, but reward bonuses and limited stamina are driving the NFT collection and trading craze.

Construction of the independent game public chain "Noah Chain": bridging reality and virtuality

NOAH

Q3–Q4 | 2024

- Anticipating the future, games are not only entertainment, but also value creation engines.
- Build the Noah X public chain, fully upload game data, governance, and operations to the chain, and break through the bottleneck of existing public chains. Decentralized storage with ETH smart contracts and IPFS, each distributed node has both computing and storage functions. X-chain supports decentralized DAPP and also supports data fragmentation and encrypted storage on X-chain, continuously empowering the industry
- X coin, as the native token of Noah Chain, NFT, as the virtual asset of NOAH ecosystem, and Y coin will be converted and mapped to the mainnet at market exchange rates to ensure the smooth evolution of the economic system. Blockchain technology transforms player interaction and game data into AI training resources, bringing profound impact and change to the real world
